EDUCATION

The University of North Carolina at Chapel Hill **Aug. 2025 – May 2027**
Master of Public Health, Global Health Concentration *Chapel Hill, NC*

- Practicum Excellence Award, 2026 | Emerging Leaders in Global Health Cohort, NC Global Health Alliance, 2026–27 | Global Health Concentration Cohort Representative, 2025–26

Duke University & Duke Kunshan University **Aug. 2021 – May 2025**
B.A., Interdisciplinary Studies (Global Health & Public Policy), Duke University *Durham, NC*
B.S., Global Health & Public Policy, Duke Kunshan University *Kunshan, China*

- Public Policy Student Fellow | Fubon Scholar (merit 60% tuition award) | 1st Place, HackDKU 2025 (Healthcare/Biotech Track)

EXPERIENCE

The Water Institute at UNC **Sept. 2025 – May 2026; Aug. 2026 – Present**
Graduate Work-Study Student, Communities of Practice *Chapel Hill, NC*

- Coordinated webinar production for two global communities of practice (~1,300 subscribers in 50+ countries), from speaker outreach and Mailchimp campaigns to Zoom logistics and recordings; increased average WASH in HCF webinar attendance by 50%
- Helped launch the WASH Circuit Riders Community of Practice: set up washcircuitriders.org on UNC-hosted WordPress, grew the subscriber list from 0 to 297, and established a bimonthly webinar series
- Rewrote both communities' SOPs into AI-ready guides with tool-agnostic prompts, refreshed logos and slide templates

Hanoi Medical University, Center for Research and Training on Substance Use-HIV (CREATA-H) **June – July 2026**
MPH Practicum Intern, Sexual Health Promotion Clinic *Hanoi, Vietnam*

- Designed and executed a negative-binomial interrupted time series analysis of seven years of clinic records (86 monthly observations, ~11,000 clients) to estimate the effect of the 2025 PEPFAR/CDC funding withdrawal on PrEP initiation, medication dispensing, and service utilization in an MSM-predominant population
- Built the analysis pipeline in R from raw REDCap exports, reconstructing the clinic's existing Stata reporting definitions to reproduce their internal monthly counts exactly, and isolating the funding effect from a concurrent research cohort that would have masked it
- Delivered a results memo, reproducible analysis repository, and a share-out to clinic leadership, CDC, and CREATA-H investigators, informed by key-informant conversations with clinicians and program staff

FHI 360 **May – Aug. 2024**
Stanback Fellow, Research and Knowledge Management – WASH *Durham, NC*

- Developed resources for the Just Ask microlearning initiative and wrote a ChatGPT-assisted drafting procedure with citation verification and technical review steps
- Developed Global Handwashing Day campaign materials and reviewed a hand-hygiene research summary for clarity and accurate interpretation of findings

United States Agency for International Development **May – Aug. 2023**
Student Trainee, Bureau for Global Health – Office of HIV/AIDS (OHA) *Washington, DC*

- Conducted compliance reviews for $2M+ in HIV/AIDS subawards across 20+ country teams to ensure alignment with PEPFAR policies and USG regulations
- Coordinated technical inputs for Country Operational Plans and key population programming under EpiC

PROJECTS & RESEARCH

BRFSS Insights, UNC Gillings AI and Public Health Datathon **Spring 2026 – Present**
Front-End Design and Deployment | Most Creative Solution, Team Red *Chapel Hill, NC*

- Designed and built the participant-facing survey flow and front end for a diabetes risk estimation tool (logistic regression on CDC BRFSS data), deploying the full-stack Node.js prototype to Vercel
- Presented the prototype to NC DHHS leadership, leading to a proposed UNC–NC DHHS collaboration to develop and validate a refined public-health application based on the model; MOU and project scope are currently under review
- Accepted to present a poster on generative AI for people-centered public health tools at the 2026 NC Global Health Conference

Signature Work Thesis, Duke Kunshan University **Feb. 2024 – Mar. 2025**
Bridging the Divide: Global Health and International Development Policy Priorities in the Trump and Biden Eras

- Analyzed 2,300+ USAID global health documents using machine learning-assisted topic modeling (BERTopic) to compare policy attention across the Trump and Biden administrations

SKILLS

Technical & Analytical: R, Python, Stata, REDCap, BERTopic, Dedoose, Qualtrics, Vercel
Communications: WordPress, Mailchimp, InDesign, Zoom webinar production, slide/visual design
Methods: Interrupted time-series and quasi-experimental design, predictive modeling, topic modeling
Languages: English (Fluent), Mandarin Chinese (Intermediate), Vietnamese (Basic)
